ES&E

2024

PATH TO ANALYTICS

Solutions to aggregate, move, display and analyze data

Want to learn about the modern ways to get meaningful data from your equipment?

Need to get more out of your SCADA system?

Want to get started on Industry 4.0 but not sure how?

If so, come to ES&E's Path to Analytics seminar on June 13, 2024, in Winston-Salem, NC, and learn how to make smarter operational decisions based on your systems' data. In this seminar, you will discover multiple paths to collecting real-time data from various sources and the tools to aggregate, visualize, and analyze the data to help you make better decisions for better optimization.
