SAFE BY DESIGN

Discovering Smart and Safe Machines

Do you want a safe machine? Do you want to maximize machine uptime?
Do you want efficient use of your limited resources? Do you need a risk assessment?
Do you want more visibility with your manufacturing equipment?

If you answered yes to any of these questions, this event is for you! Safe by Design aims to give customers a comprehensive understanding of the machine safety lifecycle and demonstrate the intelligence behind modern machine and controls design. Attendees will gain insights into various solutions that can be utilized at every stage of a machine's life. By embracing the latest technology for smart manufacturing and functional safety, customers will discover how to optimize their processes for efficiency, effectiveness, and safety.

Event Schedule

8:30 AM - 9:30 AM
Smart Automation

9:30 AM - 10:30 AM
Safety Automation

10:30 AM - 11:30 AM
Smart and Safe Automation

11:30 AM - 12:30 PM - Lunch

12:30 PM - 1:30 PM
Benefits of Smart and Safe
Automation
