

# GSM 2000

**Machine Guarding/Safety Systems from GSM**

GSM 2000 - The perfect allround solution for every application

# GSM 2000

The perfect allround solution: variable, flexible and solid design

**GSM 2000** – The allround solution for your machine guarding needs offers numerous application options because of its simple and solid design. Flexibility at its best: With 7 different standard heights and 14 different standard widths the GSM 2000 is adaptable to almost any user requirements.

Not only is the GSM 2000 a machine guarding system. It can also be used as a safety perimeter fence for storage areas or other areas where safety is important. The solid but reasonably priced safety system is designed with the high level of quality in mind that GSM is known for.

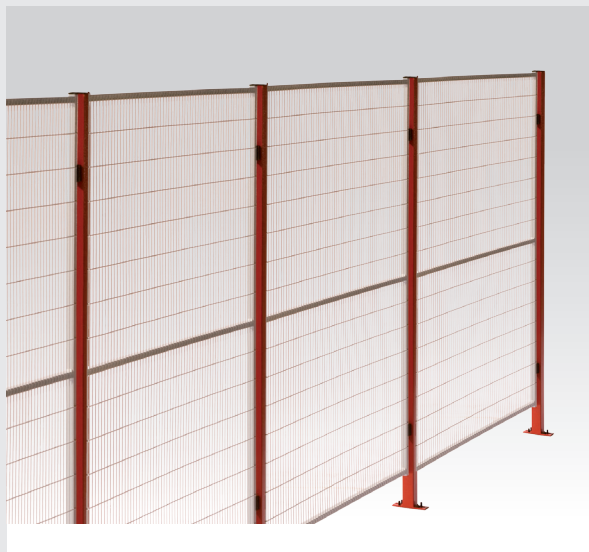

## Advantages at a glance:

- the GSM 2000 arrives pre-assembled at your installation site
- simple installation (no tools needed)
- innovative, patented hanging mechanism
- optional tiltable bracket allows for adjustability from -90 to +90 degrees
- easy and simple mounting of cable channels
- high stability is a given; also on uneven surfaces

## GSM 2000 safety fences

- welded frame construction offers great stability
- steel mesh fence completely welded to the steel frame
- reinforcement of the steel frame with additional horizontal steel bars
- slot opening < 20 mm
- special filling material instead of wire mesh fence available on request
- optional mounting of cable channels possible

## GSM 2000 posts

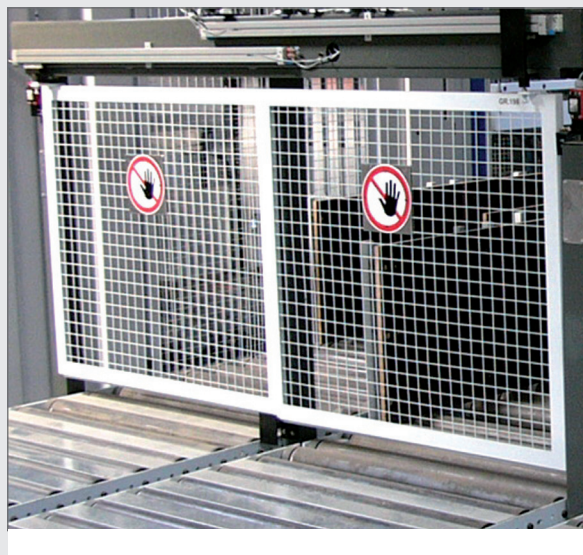

- solid design with 50 x 50 steel tube profile
- guarding system available in heights from 1,400 mm to 2,700 mm in 200 mm increments
- solid footing because of extra large base plate (150 x 50 mm)
- post can be bolted to the floor with M10 or M12 dowels
- continuous welded seam between base plate and steel tube profile
- quick installation because of pre-assembled post

## GSM 2000 hinged doors

- solid execution with 50 x 50 mm steel tube profile and portal design
- doors available in heights of 1,400 to 2,700 mm
- solid footing because of extra large base plate
- door handles and locks available in a large variety
- integrated electrical access device available as an option
- quick installation because of pre-assembled components

## GSM 2000 sliding doors

- sliding doors for transport of material
- pneumatically driven and electrically connected (incl. register, reset, E-stop etc.)
- quick assembly because of pre-assembled components
- guide rails equipped with ball bearing equipped carriages
- easy alignment due to pre-assembled set screws and solid base plate
- the interface to the machine switch cabinet is equipped with a safety switch
