

ES&E SERVICES & SOLUTIONS

ELECTRICAL SAFETY SERVICES

In addition to machine safety services provided by TUV certified professionals, we now provide a variety of electrical safety and testing services to keep your plant safe and operational.

The logo for ES&E, featuring the letters 'ES&E' in a bold, white, sans-serif font. The ampersand is smaller and positioned between the 'S' and 'E'. The logo is set against a dark blue rectangular background with a thin white border.

ES&E has expanded our offerings and partnerships to provide more safety services than ever.

ES&E SERVICES & SOLUTIONS

ELECTRICAL SAFETY SERVICES

Arc Flash Assessment

Keep your facility and your employees safe

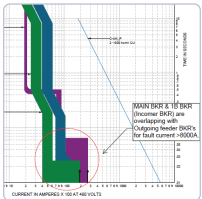

An Arc Flash Study can help you identify arc flash hazards and stay up-to-date on industry safety standards.

Circuit Breaker Testing

Verify the protection of critical equipment

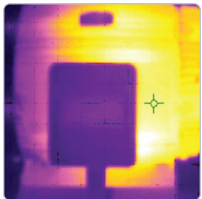

Reduce the risk of a major safety event and damage to key equipment with our breaker testing services as part of a scheduled maintenance plan.

Coordination Study

Don't let minor incidents create major headaches

This service can help prevent major power outages due to machine level faults.

Panel Thermography

Prevent catastrophic machine failure due to temperature increases

Get thermal images of your panel at least once per year if not more often, and compare with previous visits to understand where improvement is needed.

Lockout Tagout

Protect your workforce, protect your company

Take the stress out of compliance and allow us to help you protect your workforce and your company with accurate easy-to-follow lockout/tagout instructions.

Personal Protective Equipment

Keep your employees safe AND comfortable

ES&E can provide standalone PPE as well as PPE recommendations based on your facility when combined with our Arc Flash Analysis.
