

Connected Smart Shelves

What It Does

The SRX Smart Shelves eliminate the need for manual counting, scanning, and placing orders. By being linked to SRX software, the shelves keep track of on-hand inventory levels, monitor min/max levels, and automatically transmits replenishment requests to suppliers.

- Eliminate manual counting or scanning
- Instant order placement when below min level
- No need for a phone call, text, or email.

How It Does It

By calculating the weight of the inventory, on-hand levels are automatically calculated. When levels go below the min a replenishment request is automatically transmitted.

- Automatically calculate on-hand inventory levels
- Automatically transmit replenishment requests.
- Accurate to 8 grams
- 30lbs of storage per 4" tray

Checkout Software

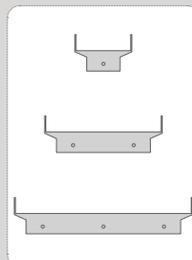

- Walk-in, grab products, and walk-out. No software interaction needed
- Increase productivity and product visibility
- Wirelessly monitor product usage and historical data from anywhere in the world
- Capture images of products as they are removed from the shelf
- Automatically reorder items as products hit their reorder point

Accessories

Bins

4", 8", 12" Trays
